

### TT8 Thermotool

#### TT8 Thermotool

When combined with the TP2/HE Thermopak the TT8 Thermotool is ideal for soldering and silver soldering refrigerating and copper pipework up to 3/8" diameter. It is especially convenient for cramped working conditions as the jaws do not need to be opened to make a good connection.

#### Technical specification

Electrode:	TC16
Electrode Area:	Application dependant
Cable CSA:	35mm <sup>2</sup>
Thermopak:	TP2
